Zane Goodson

Prapthi Belman

Colby Patterson

Christopher Encinia

Introduction of our Entrepreneur

Our assigned Aggie Entrepreneur is Jacob Shelton. Jacob graduated from Texas A&M University in December 2024 with a Bachelor's Degree in Business Administration and Management. Jacob Shelton is a dynamic and highly accomplished entrepreneur with a strong background in sales, marketing, and team leadership. Over the past several years, Jacob built a standout reputation in direct sales through his time with Vector Marketing, where he held numerous leadership roles and set several national records, including being the #1 non-full-time representative and leading a branch that ranked top 5 in the nation. He later expanded into business consulting and gifting, helping companies improve employee and customer retention through strategic corporate gifts.

Most recently, Jacob Shelton joined Starting 5ive Productions (S5IVE), a sports focused video production company based in Fort Worth, Texas. Recruited by one of the startup's angel investors, who was formerly Jacob's client through Vector Marketing, Jacob now serves as Vice President of Operations. In this role, he helps lead the company's goal to craft high impact visual content that elevates the personal brands of high school and college athletes navigating the evolving NIL (Name, Image, Likeness) landscape. S5IVE also partners with youth sports organizations to improve player retention and attract college recruitment through compelling and emotionally driven storytelling.

Founded in 2023 by brothers Colt and Kyler Gayle, S5IVE specializes in premium videography and branding services. With clients ranging from Aledo High School Football to private QB trainers and collegiate athletes, the company leverages tools like Sony FX3 cameras, Adobe Cloud, and Final Cut Pro to produce their high-quality content. Operating primarily through organic marketing and collaborations, S5IVE has grown quickly and built a reputation for content that not only goes viral but also creates lasting community impact. True to their motto, "We capture and create stories that bring communities together," S5IVE continues to carve out a unique and purpose driven space in sports media

S5IVE competes in a rapidly growing yet increasingly crowded market. The **threat of new entrants** is moderate. There are advancements in affordable editing tools and cameras that make it easy for freelancers and hobbyists to enter the sports video space, but these aren't big enough of a threat since S5IVE is continuing to grow into a large brand that athletes would much rather be associated with rather than a small freelancer. The type of business that S5IVE has built is a unique one that makes it hard for new entrants to build since S5IVE was started with deep connections in the sports field, expensive inventory, and highly experienced freelance videographers in their two founders. The **bargaining power** of buyers is medium-high, as athletes and organizations have many options and often shop based on price or familiarity, making trust and reputation critical. S5IVE has the edge in an established brand that has been giving athletes quality exposure in the short time they have been doing business. The **threat of substitutes** is medium-low. With the rise of AI-generated content, basic highlight reels, and in-house school media teams, these make easy substitutes for the substitutes for the content that S5IVE produces; however, these options are rarely going to match the quality of the content produced as well as the level of exposure of S5IVE's. **Supplier power** is relatively low, since

software and gear are widely accessible and replaceable. Meanwhile, **industry rivalry** is medium-high and intensifying as more content creators enter the NIL space, but S5IVE's differentiators such as consistent athlete branding, relationship-based selling, and legacy-focused marketing help it stand out in an emotional and competitive space.

Business Model Canvas Framework

Business Model Canvas

Designed for:	Designed by:	Date:	Version:
S5ive Productions	Team 1	04/12/2025	1.6

Key Partners

- High Schools & Colleges
- Coaches & trainers (access and trust)
- Local businesses (NIL, sponsorships)
- Investors (funding, infrastructure)
- Interns (low-cost, long-term resource)

Key Activities

- High-quality video and content creation
- Recruitment of editors and videographers
- Sales via referrals, inbound via social
- Website and podcast production
- Talent matchmaking and post-production

Key Resources

- Human talent: Editors, videographers, designers
- Equipment: Sony cameras ($3K–$5K)
- Editing capacity: 12–33 hrs/project
- Office space: Provided by investor Jesse
- Financial support: 5 LPs, 3 investors ($50K/month)

Value Propositions

- Cinematic sports videography
- Athlete branding support (NIL, recruiting)
- Tailored packages (individuals, teams, schools)
- Event-based filming
- Competitive pricing ($150/hr filming, $250/hr editing)
- Fast turnaround, high quality
- Brand-driven visuals and deep local trust

Customer Relationships

- Personal 1:1 assistance
- Community-based loyalty (Cisco, Aledo)
- Intern development and mentorship
- Acquisition: Social media, referrals
- Retention: Repeat deals, loyalty perks
- Upselling: Add-ons, team + individual bundles
- Challenge: No CRM/automation

Channels

- Instagram, referrals, local events (Awareness)
- Google Drive portfolio, word-of-mouth (Evaluation)
- DMs, texts, in-person consults (Purchase)
- Google Drive, local server backup (Delivery)
- Follow-up via DM, text, rebookings (After-Sales)

Note: No booking site or email marketing

Customer Segments

- High School Athletes & Parents
- High School Coaches & Athletic Departments
- Youth Sports Organizations (e.g., Keller Youth Association)
- Private Sports Businesses (trainers, PTs, etc.)
- College & Professional Athletes

Geographic: North Texas, Texas Triangle
Behavioral: Social-media savvy, referral-driven
Type: Niche with potential for segmented/multi-sided scaling

Cost Structure

- Labor: $50K/month (goal), $125/hr per staff
- Equipment & software (Sony, Adobe, Final Cut)
- Overhead planning: 3x coverage goal
- Long editing cycles (12–33 hrs/project)

Revenue Streams

- Cinematic and branded content for athletes
- School-wide media packages
- NIL content projects
- Youth league video packages
- Sponsorships from schools and local businesses

Designed by: The Business Model Foundry (www.businessmodelgeneration.com/canvas). Word implementation by: Neos Chronos Limited (https://neoschronos.com). License: CC BY-SA 3.0

1. Customer Segments

Primary Segments:

- High School Athletes & Parents:

  Athletes seeking recruiting videos or personal branding content; parents funding highlight reels and performance showcases.
- High School Coaches & Athletic Departments:

  Interested in team-wide media packages to promote players, recruit talent, and elevate program visibility.
- Youth Sports Organizations (e.g., Keller Youth Association):

  League administrators and coaches looking for professional-grade season recap or highlight videos for youth teams.
- Private Sports Businesses:

  Trainers, physical therapists, and athlete development professionals (e.g., QB coaches, rehab centers) who need branded content for marketing and showcasing success stories.
- College & Professional Athletes:

  Occasional projects with collegiate/pro players, typically through referrals or NIL connections.

Customer Characteristics:

- Geographic: Primarily North Texas (Aledo, Cisco, DFW), with expansion targets in Texas Triangle (Austin, San Antonio, Houston).
- Behavioral: Social-media-savvy athletes/parents, strong word-of-mouth influence, highly image-conscious.
- Segment Type: Niche market with potential to scale to a segmented/multi-sided platform (e.g., athletes vs. trainers vs. schools).

2. Value Propositions

Core Offerings:

- Cinematic Sports Videography: High-quality, professionally edited sports content including highlight reels, hype videos, and game recaps.
- Athlete Branding Support: Customized visual identity and storytelling to enhance NIL value or recruiting appeal.
- Tailored Packages: Flexible pricing and service bundles for individuals, teams, or whole schools.
- On-Site & Event-Based Filming: Coverage of games, training sessions, and youth tournaments with real-time adaptability.
- Experience + Passion: Deep connection to Texas high school football culture (founders' father was Cisco HS coach), building trust with clients.

Quantitative Value:

- Competitive pricing: $150/hr filming, $250/hr editing
- Strong ROI for athletes (visibility, scholarships, NIL potential)
- Fast turnaround and consistent quality

Qualitative Value:

- Brand-driven, cinematic aesthetic
- Local roots with personal relationships (coach referrals, family reputation)
- High engagement on social platforms (10K+ views organically)

3. Channels

Awareness:

- Instagram: Main discovery channel with strong organic reach (⅔ of viewers are non-followers)
- Referrals from Coaches, Trainers, and Parents
- In-person Events: Visibility at tournaments, games, and youth leagues

Evaluation:

- Video Portfolio on Instagram & Google Drive Showcases
- Word-of-mouth trust from community leaders (e.g., Cisco HS, Aledo programs)

Purchase:

- Direct Booking via DMs, Text, or In-person Consultations
- Internally managed on Asana and QuickBooks; pricing sent informally

Delivery:

- Cloud Delivery (Google Drive) of Final Edits
- Hardware backup on local servers at Cisco office

After-Sales:

- Ongoing Project Opportunities: Especially for returning clients (e.g., new season, different sport)
- Follow-up via Instagram DMs or text (highly personal)

Current Weakness: No content calendar, no booking site, no email marketing — all marketing is product-led and organic.

4. Customer Relationships

Types of Relationships:

- Personal Assistance: Highly customized, 1:1 communication for each client
- Community-Oriented: Deep ties in Cisco and Aledo, loyalty from coaches and parents
- Intern Development: Training and mentoring young creatives fosters long-term relationships with talent

Acquisition:

- Through reputation, referrals, Instagram, and community events

Retention:

- Continued seasonal coverage (e.g., full football season)
- Loyalty discounts or premium offers for recurring clients
- Emotional investment: Families are proud of athlete videos

Upselling:

- Add-ons like multi-game coverage, personalized reels, or off-season training content
- Potential for bundled services (e.g., full team + individual athlete features)

Challenges:

1. No CRM system or automated customer follow-up
2. Reliant on founder bandwidth for relationship management

5. Revenue Streams

Revenue Model			
B2B		Revenue Range:	
Retainer model	3 months	$2,500	$3,000
	Centre Retainers	$5,000	$10,000
	High Level Retainers	$15,000	$20,000
One time service	Video Production	$500	$2,500
	Website Design	$10,000	$12,000

- Sponsorships for High Schools: Especially Aledo football, potentially expanding to club and junior high sports.
- Upselling Cinematic & Branded Content: Premium content includes sizzle reels, cinematic recaps, and highlight reels for athletes and schools.

6. Key Resources

Human Resources:

- Editors
- Videographers
- Graphic designers (Kyler, Colt, and others)
- Skilled creative talent is the biggest constraint.

- Camera Equipment: Investment of $3K–$5K per basic model
- Editing Infrastructure: In-house editing capacity, 12–33 hours per project.
- Recruitment Process: Based on Revenue per employee and post-90-day review for full-time conversion.

- Financial Backing: 5 LPs and 3 investors; operating at ~$50K/month revenue and ahead of schedule.

7. Key Activities

- Content Creation: The company's core focus is delivering high-quality, visually compelling content tailored to each client's needs. This includes highly skilled edited videos, posters, graphics, and reels, which serve as the company's primary value proposition. Content is strategically created and optimized for distribution across six key marketing platforms: Instagram, TikTok, Facebook, LinkedIn, the company website, and an additional promotional channel.
- Website Development: Especially for high school football and basketball teams, this also includes personal website for any player
- Recruitment & Talent Matchmaking: Identifying skilled creators who align with brand needs, especially focusing on the editing skills making the deliverable match the skillset of the founders
- Sales & Client Acquisition: Direct outreach, referrals, and social media-based inbound. The quality content makes them have word of mouth as their key point of sale
- Podcast Production: The company is currently working on Growing media presence via S5IVE podcast.

8. Key Partnerships

- Colleges & High Schools: Crucial relationships to produce content and gain access.
- Coaches & Quarterback Trainers: Act as influencers and access points to athletes.
- Local Businesses: NIL and sponsorship deals with local players.

- Investors: Provide capital for growth and cover overhead.

9. Cost Structure

- Labor Costs: Editors, videographers, and support staff. Goal: 4 people × $125/hr = $50K/month
- Equipment Costs: Camera investment, software, etc. approximately five to ten thousand dollars considering the whole kit, excluding the maintenance
- Overhead Planning: Aim for 3X overhead to stay profitable.
- Project Timelines: Twelve to thirty-three hours per video = high labor time; optimizing production timelines would reduce costs.

Recommendations

Building on our collective analysis of S5IVE Productions' Business Model Canvas, it is clear that the company has a strong value proposition, consistent demand, and a continuously growing client base. However, the internal infrastructure and operational capabilities of the company are not yet scaled adequately to meet that growing demand. The most pressing challenge that the company is currently facing is a shortage of videographers and, more importantly, editors, which limits the company's ability to take on new client opportunities. This staffing gap, or expertise gap, combined with the lack of a centralized project management system and a loosely defined vision and mission direction, is hindering the company from long-term sustainable growth. To address these issues and position S5IVE for long-term growth,

we propose three key recommendations: developing a talent pipeline, implementing a unified project management system, and defining the company's mission and vision.

Launching a Structured Training Program

First, to help alleviate the staffing issues, we recommend launching a structured, in-house training program. This program is essentially a short boot camp designed to recruit and equip young creators with the core skills needed for sports media production. The ideal candidates would be recent graduates or self-taught videographers/editors who already have some technical knowledge but need training specific to S5IVE's style and standards. The program could run over four weeks and include practical camera training, editing fundamentals using Adobe Premiere Pro, and hands-on assignments that simulate real game-day filming and post-production.

We understand that the company has very high standards and expectations for their media content, and because of this, they can charge premium pricing for their product. We believe that by implementing this system, not only will the quality of media improve, but the pricing model will be better protected long-term. Individuals who perform well during this ninety-day period can be considered for full-time employment, which helps create a reliable, more structured staffing pipeline. Additionally, this approach helps build loyalty among new recruits/interns by offering a clear path from training to potential full-time positions.

Implementing a Unified Project Management System

One of the other significant insights our group uncovered while working with S5IVE was the need for a more structured and centralized workflow. As the company scales its content output and staffing efforts, the current approach to managing projects, largely informal and

conversation-based, poses a clear risk to both quality and efficiency. Without a unified project management system in place, we believe that the company could run into potential roadblocks such as: missing footage, miscommunicated deadlines, overlapping assignments, or simply confusion about what needs to be done next. These small inefficiencies can easily spiral into greater dilemmas, particularly in a company like S5IVE that depends on fast turnaround, high-quality media production, and external contractors that they're hiring to complete work.

Moreover, having a centralized system is beneficial for leadership as well. Instead of spending hours chasing down updates or reviewing individual DMs, leaders can quickly check task boards, leave feedback in one place, and better forecast what's needed for the upcoming week. The shift from reactive to proactive project planning is, in my view, a turning point for any creative business. In this sense, the investment in a platform and a few hours of setup would pay off quickly in saved time, reduced stress, and improved output.

In total, implementing a project management system at S5IVE would transform the way the company operates. It would provide structure to a currently informal process, offer new contractors an easier entry point into the brand, and ultimately help leadership focus on creative strategy instead of operational chaos.

Defining the Company's Mission and Vision

In any startup or creative venture, it's common for the founders to carry a strong sense of purpose and direction in their heads without taking the time to write it down and establish it within the company. The team clearly has a unique aesthetic, high standards for their production quality, and an authentic connection to football culture, especially in Texas. However, through our conversations and research, it became clear that this powerful sense of identity has not yet been established into a clear mission or vision statement. Our team believes that this is a major

missed opportunity, not just in terms of branding, but in how the company builds its culture, hires talent in the future, and communicates its purpose and value to the public.

Our recommendation that we have come up with in our group is for S5IVE to define both a mission and a vision statement through a short but intentional internal process. A mission statement should ultimately answer what S5ive does, who the company serves, and why it exists. This tells a new hire, a client, or even a fan exactly what S5IVE is about. Furthermore, a vision statement speaks more to the company's long-term goal and where they want to be in the future. As individuals working on a project to support this company, we realized how often we had to interpret or guess at what S5IVE stood for, because it wasn't written down or established. Even with a smaller team, just having a mental, unestablished picture of what the company stands for isn't enough to encourage sustainable growth.

Another important reason to define these statements is recruitment within the company. One of S5IVE's biggest challenges is finding and retaining reliable independent contractors who align with the brand's values and brand. But when people don't understand what the company is trying to accomplish or why it exists, it's hard for them to feel connected to the work and want to come shoot film for S5IVE. These established statements will give contractors a reason to come work and even potentially stay with the company. From a leadership standpoint, we also believe a mission and vision can provide much-needed clarity in decision-making. As the company expands, new opportunities will come up with clients and partnerships along with new markets to dive into. Having a guiding mission and vision will help the team assess which opportunities align with their core values and which ones are distractions to the company's growth.

PRES - Requirements

CTP Deliverables:

1. CTP Final Report - this is a 15-page maximum report detailing the team's research findings, Business Model Canvas Framework expression, and the final recommendations (what, why, & how). This is in essence, a detailed review of the team's final presentation. This will be emailed to the team's assigned student entrepreneur by the due date of submission to Canvas as well. Additional instructions for this deliverable are provided in the "Resources" module in Canvas. All Final Reports should be crafted in Times New Roman font, size 12, and double-spaced.

2. CTP Final Presentation - this is a 20-minute maximum live, in-person presentation delivered to Dr. Sanchez, your classmates, and the student entrepreneur on the team's assigned date in Canvas. Instructions provided below.

CTP Presentation Criteria:

1. Create a slide deck presentation utilizing Microsoft Power Point, Kaltura, Prezi, Google Slides, Gamma, or Canva.
2. Each team member must present an equal share of the live, in-person presentation.
3. Dress appropriately (business casual), speak clearly, eliminate distractions/interruptions - be professional.
4. All presentations will take place on the assigned dates listed in Canvas.
5. The presentations must be no longer than a maximum of 20 minutes.

CTP Presentation Components:

1. Introduction expressing a brief overview of the teams' assigned student entrepreneur
2. Expression of the Business Model Canvas Framework for the student entrepreneur's endeavor/startup business.
3. Recommendations for the student entrepreneur (WHAT the recommendations are, WHY the team is recommending these courses of action, and HOW the team recommends the student entrepreneur proceeds - actionable steps)
4. Summative Comments from the team members

CTP Presentation Tips & Hints:

- Do NOT insert an "agenda" or Table of Contents in your slide deck presentation (there is no need!)
- Look professional when you present!
- Practice! (it is strongly recommended team members do not utilize note cards or read from a screen)

- Teamwork! (share the workload in presenting / practice the order in which you'll be presenting / know where everyone will stand / know how and who'll be advancing the slides!)
- Start preparing early / make it visually engaging / make it emotionally compelling - these always score highest!

CTP Grading Criteria:

The final report and the, live, in-person Consultative Team Project (CTP) presentations will be delivered in-person on their assigned date (see Canvas modules) and each deliverable will be graded as follows:

+25 points possible for CONTENT (was it rich, meaningful, relevant, current, significant? Were all the required components included and supported?)

+25 points possible for PREPARATION (was it rehearsed, practiced, & professional? Was it apparent the team and all members were prepared/put time and energy into the presentation?)

+25 points possible for TEAMWORK (was there synergy, collaborative efforts, and an equal share in presenting the material?)

+25 points possible for QUALITY (was it an engaging presentation, visually and emotionally? Were all the required elements adhered to? Was there sufficient evidence to support the components?)

---

100 points total

Recommendation Rough Draft

Building on our collective analysis of S5IVE Productions' Business Model Canvas, it is clear that the company has a strong value proposition, consistent demand, and a continuously growing client base. However, the internal infrastructure and operational capabilities of the company are not yet scaled adequately to meet that growing demand. The most pressing challenge that the company is currently facing is a shortage of videographers and, more importantly, editors, which limits the company's ability to take on new client opportunities. This staffing gap, or expertise gap, combined with the lack of a centralized project management system and a loosely defined vision and mission direction, is hindering the company from long-term sustainable growth. To address these issues and position S5IVE for long-term growth, we propose three key recommendations: developing a talent pipeline, implementing a unified project management system, and defining the company's mission and vision.

Launching a Structured Training Program

First, to help alleviate the staffing issues, we recommend launching a structured, in-house training program. This program is essentially a short boot camp designed to recruit and equip young creators with the core skills needed for sports media production. The ideal candidates would be recent graduates or self-taught videographers/editors who already have some technical knowledge but need training specific to S5IVE's style and standards. The program could run over four weeks and include practical camera training, editing fundamentals using Adobe Premiere Pro, and hands-on assignments that simulate real game-day filming and post-production.

We understand that the company has very high standards and expectations for their media content, and because of this is able to charge premium pricing for their product. We believe that

by implementing this system, not only will the quality of media improve, but the pricing model will be better protected long-term. Individuals who perform well during this 90-day period can be considered for full-time employment, which helps create a reliable, more structured staffing pipeline. Additionally, this approach helps build loyalty among new recruits/interns by offering a clear path from training to potential full-time positions.

Implementing a Unified Project Management System

One of the other significant insights our group uncovered while working with S5IVE was the need for a more structured and centralized workflow. As the company scales its content output and staffing efforts, the current approach to managing projects, largely informal and conversation-based, poses a clear risk to both quality and efficiency. Without a unified project management system in place, we believe that the company could run into potential roadblocks such as: missing footage, miscommunicated deadlines, overlapping assignments, or simply confusion about what needs to be done next. These small inefficiencies can easily spiral into greater dilemmas, particularly in a company like S5IVE that depends on fast turnaround, high-quality media production, and external contractors that they're hiring to complete work.

Moreover, having a centralized system is beneficial for leadership as well. Instead of spending hours chasing down updates or reviewing individual DMs, leaders can quickly check task boards, leave feedback in one place, and better forecast what's needed for the upcoming week. The shift from reactive to proactive project planning is, in my view, a turning point for any creative business. In this sense, the investment in a platform and a few hours of setup would pay off quickly in saved time, reduced stress, and improved output.

In total, implementing a project management system at S5IVE would transform the way the company operates. It would provide structure to a currently informal process, offer new

contractors an easier entry point into the brand, and ultimately help leadership focus on creative strategy instead of operational chaos. As someone who's worked in both structured and unstructured teams, I believe this change would be a game-changer—not just for productivity, but for company culture as well.

Defining the Company's Mission and Vision

In any startup or creative venture, it's common for the founders to carry a strong sense of purpose and direction in their heads without taking the time to write it down and establish it within the company. The team clearly has a unique aesthetic, high standards for their production quality, and an authentic connection to football culture, especially in Texas. However, through our conversations and research, it became clear that this powerful sense of identity has not yet been established into a clear mission or vision statement. Our team believes that this is a major missed opportunity, not just in terms of branding, but in how the company builds its culture, hires talent in the future, and communicates its purpose and value to the public.

Our recommendation that we have come up with in our group is for S5IVE to define both a mission and a vision statement through a short but intentional internal process. A mission statement should ultimately answer what S5ive does, who the company serves, and why it exists. This tells a new hire, a client, or even a fan exactly what S5IVE is about. Furthermore, a vision statement speaks more to the company's long-term goal and where they want to be in the future. As individuals working on a project to support this company, we realized how often we had to interpret or guess at what S5IVE stood for, because it wasn't written down or established. Even with a smaller team, just having a mental, unestablished picture of what the company stands for isn't enough to encourage sustainable growth.

Another important reason to define these statements is recruitment within the company.

One of S5IVE's biggest challenges is finding and retaining reliable independent contractors who align with the brand's values and brand. But when people don't understand what the company is trying to accomplish or why it exists, it's hard for them to feel connected to the work and want to come shoot film for S5IVE. These established statements will give contractors a reason to come work and even potentially stay with the company. From a leadership standpoint, we also believe a mission and vision can provide much-needed clarity in decision-making. As the company expands, new opportunities will come up with clients and partnerships along with new markets to dive into. Having a guiding mission and vision will help the team assess which opportunities align with their core values and which ones are distractions to the company's growth.

Opportunities for comsulation points

🟡 *Opportunity:* Add tiered pricing for schools, sports, and individuals; offer bundles or discounts if a school is already partnered.

🟡 *Gap:* Need defined tech stack (hardware + software); training programs to replicate founder skills; scalable hiring funnel.

🟡 *Challenge:* Lack of structure in SOPs for marketing, onboarding, and project timelines. Creating a training curriculum is needed to scale.

🟡 *Current Strategy:* Cost-effective in-house production is preferred. However, no defined SOPs

or tech/software stack leads to inefficiencies.
